About

I am a hard-working, enthusiastic person who loves coding and being a part of an innovative product, I've been self-teaching myself web development for about 2 years now and have loved the journey from creating my first website to building big personal projects in React. I am always keen on learning and developing my professional skills whilst making a positive contribution to the team.

Experience

Freelance Web Developer

Jan 2020 - Dec 2020

Making websites for clients on Discord

Part Time

- Making websites for clients mainly in HTML5, CSS3 and some JavaScript. I stopped taking clients due to wanting to study more and working on personal projects.

Projects

cssbuttons | React, JavaScript, HTML5, CSS3, SASS, Tailwind CSS, Vercel 2020 - 2021

- cssbuttons is a buttons collection built in React. It's main purpose was to give a collection of pure HTML5 and CSS3 buttons to web developers with ease. Since this project's launch, it has gotten over 10,000 visitors.
